Agenda

August 29, 2017

Chair: Katon Akhmad Zaky

1 Present

- a1646514 Matthew Kozirev
- a1666784 Hoang Long Pham
- a1668396 Benjamin Thomas Schuh
- a1672490 Ngoc Chau Khuc
- a1680219 Katon Akhmad Zaky
- a1687852 Simon James Gray
- a1695329 Yong Yang, Maximilian

2 Group Roles

- GUI group: Hong Long, Katon and Maximilian
- Rover communicaiton group: Matthew and Chau
- Pathfinding and sensor group: Simon and Benjamin

3 Client

The chair of the team shall present and demonstrate to the client on the following items:

3.1 GUI Prototype

The chair shall present and demonstrate the requirement functionality of the UI that has been successfully integrated to the GUI. The functionality of the UI will be presented in the order of their level of requirement priority. All questions to the client and from the client shall be resolved before we proceed to the basic movements of the rover.

3.2 Basic Movements

The chair shall present and demonstrate the current movement capabilities of the rover through the control of the GUI. All inquiries regarding the basic movements shall be resolved before the client meeting ends.

4   Other Issues

The group will answer any questions the client would like to inquire about, and report in the next meeting if they cannot produce a definite answer at the time of asking.

Note: Next client meeting is to be held on September 5, 2017.
